Lyrics by: Jared Lee

Fuck you and your bullshit ways
Won't take it another day
Your flase idols will now turn
On you and those who follow

Prepare for the fill of innocence

Failure is my name
A god's mind set on change
Burn the day
No choice, must embrace the plague

Fall to decend, reverse the absence
The coil twists in deeper
The fall of man and all human excess
Too smart to die
Too dumb to surrender

All hail the new order of the dying race
Embrace the plague
