Well I've got love in my blood  
And I've got you on my brain  
I haven't got enough blood  
I cannot love you enough  
If you've got love in your blood  
If it is bolder than death  
Oh let it spill, let it spill  
Over the heart you love best

Tumble up the old song  
New love, let it grow  
We will never fall apart  
You can't tear a soul but you can tear a heart  
The summer sun is slow to fall  
Our shadows stretched out over the lawn  
Take a picture before we're old  
We've never looked so beautiful

And I will build a towering pile  
Of passion built by my desire  
Don't give me time to gather the fuel  
For an old flame in time will cool  
I give you my flesh and all its ambition  
I give you my love and all of this vision  
If you love me just the same  
We will never ever pass away

Well I've got love in my blood  
And I've got you on my brain  
I haven't got enough blood  
I cannot love you enough  
If you've got love in your blood  
If it is bolder than death  
Oh let it spill, let it spill  
Over the heart you love best

Well I've got love in my blood  
And I've got you on my brain  
I haven't got enough blood  
I cannot love you enough  
If you've got love in your blood

If it is bolder than death  
Oh let it spill, let it spill  
Over the heart you love best

I want your love in my blood  
'Cause I need you in my veins  
I know you've got enough love  
To save the day then you'll take  
Well I've got love in my blood  
And I've got you on my brain  
I haven't got enough blood  
I cannot love you enough

If you've got love in your blood  
If it is bolder than death  
Oh let it spill, let it spill  
Over the heart you love best  
Well I've got love in my blood  
And I've got you on my brain  
I haven't got enough blood  
I cannot love you enough
