F. Parris

In the still of the night
I held you, held you tight
Cause I really love you
Promise I'll never let you go
In the still of the night (in the still of the night)

I remember (I remember) that night in May (I
remember)
The stars were bright (I remember) above (I remember)
I'll hope (I remember) and I'll pray (I remember)
To keep your precious love

Well before the dawn's light
Hold me again with all of your might
In the still of the night (in the still of the night)

I remember (I remember) that night in May (I
remember)
The stars were bright (I remember) above (I remember)
I'll hope (I remember) and I'll pray (I remember)
To keep your precious love

Well before the dawn's light
Hold me again with all of your might
In the still of the night (in the still of the night)
In the still of the night
