Brian Wilson/Mike Love

Well back in time with just a rhythm and rhyme

Gregorian chants were a real big thing

They took that chant and added harmony

It was a different sound But had the same meaning

I know (I know) I know (I know)

It took us a long while

To go (to go) to go (to go)

And find us a rock style

I know (I know) I know (I know)

That we can take it one more mile because

We're singing that same song

We're still singing that same song

We're singing that same song

That same song, That same song

The rock of ages Built that rockin' sound

'Til more and more people start to come around

They worshipped in church And built that great big
choir

It grew and it grew Until it spread like fire

I know (I know) I know (I know)

It took us a long while
To go (to go) to go (to go)
And find us a rock style
I know (I know) I know (I know)
That we can take it one more mile because
We're singing that same song
We're still singing that same song
We're singing that same song
That same song That same song
Same song Oh yeah
Same song Oh yeah
Same song that same song
Same song Oh yeah
Same song Oh yeah
Same song that same song
