Yesterday you said it was over  
You letting me go  
Didn't give no explanation  
But it was the time to move on  
I held my heart in my hands as you walked away  
I heard you whisper softly please don't you change  
Said I was beautiful and I understand one day  
But until that day

Chorus:

How could you love and give it all love  
How could this... those things  
You just hit in me  
How could I trust my love in your hands  
How could you run when I was ready to go all the way  
All the way

Just when I thought this was forever

You took that away oh  
All the pieces work it together and put in a frame  
I was afraid to fall in love and now you've made  
This harder than before  
Right me, right now  
You told me this was meant to be  
And now you're walking out of my door  
How could you do this

[Chorus:]

So now this is over and we just come in...  
Of the love we share when you were part of me  
But somehow you got... as you were falling deep for me  
But we can still have it all

[Chorus:]
