

## Shonen Knife "Insect Collector"

Going to a mountain alone with her insect cage  
Lost track of time while waiting for another insect  
Konchu saishu

Going home to give an inspection to a little shell  
Consulting a picture book to see what she collected

Konchu saishu

All arranged neatly in a case and kept with care  
Just before bedtime one more look and she's happy  
Insect collecting is a hobby few can share  
But when she's thinks about her insects  
She feels happy, oh so happy, she is happy

She's an insect collector
