"The Moon World"

Visit "[The Moon World](#)" on MotoLyrics.com

Take me to the moon where it's very blue
I think I've read too many science fictions

The moon world, the huge computer
On the teleguided beam
The moon world, I've been dreaming;
My thought systems are about to burst

I won't suffocate without oxygen
What a wonderful place
I won't be held down by gravity
What a nice place

The moon world, the huge computer
On the teleguided beam
The moon world, I've been dreaming;
My thought systems are about to burst
