It is time to wake up, now
Let's rush out of your room, now
If you have nothing to do, you must be bored
Getting dangerous again
Let's take out your weapon
If you do nothing at all, you'll be destroyed

Nothing's impossible
If you wind your spring
You can do anything

If you have nothing to do, you must be bored

It is time to wake up, now
The alarm clock's ringing, now
If you have nothing to do, you must be bored
There are rumors in this world
Let's get them out of this world
If you have nothing to do, you must feel tired

Nothing's impossible
If you wind your spring
You can do everything

Nothing's impossible
If you wind your spring
You can do everything
