"Candlelight And You"

Visit "[Candlelight And You](#)" on MotoLyrics.com

There's no easy way to explain, how I feel for you,
so I say with every emotion, what falling in love can do,
to my romantic heart, you've helped me through the
rain,
take me in your arms, I give you control,
tenderly,
whisper to me, I'm all you need,
finally...

Candlelight and you,
for all the things that you are to me, and what you do,
I want candlelight and you,
the end of the day I will faithfully come home to,
candlelight and you,
take everything away from me, what sees me through,
candlelight and you,
in all of the world, i know it's true,
nothing compares to candlelight and you.

Lady, there's no way to deny, that you keep love new,
so I'll give you what you desire, I found what I need in
you,
you can believe in me, and I won't let you down, I'll be
here,
and I want you to know that I love you,
like no other man could ever, ever do,
and I'll keep holding on for candlelight and you.

Candlelight and you,
for all the things that you are to me, and what you do,
I want candlelight and you,
the end of the day I will faithfully come home to you,
candlelight and you,
take everything away from me, what sees me through,
candlelight and you,
in all of the world, i know it's true,
nothing compares to candlelight and you.

I'm in the mood tonight,
I feel as free as a kiss in the wind (ooh, ooh baby),
and if I had to live my life all over again,

what I would do, is be with you (you baby).

Candlelight and you,
for all the things that you are to me, and what you do,
I want candlelight and you,
the end of the day I will faithfully come home to,
candlelight and you,
take everything away from me, what sees me through,
candlelight and you,
in all of the world, i know it's true,
nothing compares to candlelight and you.

Tonight is the night (tonight is the night),
let's turn off the lights (let's turn off the lights),
I'm in the mood, the mood for you,
I get off ---- ---- ----.
Come on, come on, tell me will this be right,
I've been waiting on to you, just for you,
let's go baby.
Come on, come on, come on, light a candlelight,
candlelight and you, let's do it right,
give me the love I want from you,
candlelight and you,
I want candlelight and you.
