Oh we've got
Lots in common where it really counts
Where it really counts, we got large amounts
What we look like doesn't count an ounce
We've got lots in common where it really counts

(Wilbur) you've got feathers, ive got skin
but we both our outsides hold us in

(Calf) ive got hooves, you've got web feet
but we both stand up to eat

Cause we got
Lots in common where it really counts
Where it really counts, we got large amounts
What we look like doesn't count an ounce
We've got lots in common where it really counts

(Wilbur) you've got a beak and I a snout
but both of us can sniff about

(Horse) you'll say quack and ill say neigh
But we're talking either way
Oh we've got
Lots in common where it really counts
Where it really counts, we got large amounts
What we look like doesn't count an ounce
We've got lots in common where it really counts

(Charlotte) you're born to swim and I to spin
But we both love this world were in
We share the sun, the Earth, the sky
And that's the reason why
We've all got
Lots in common where it really counts
Where it really counts, we got large amounts
What we look like doesn't count an ounce
We've got lots in common where it really counts
