I know when you know I
cant be on my own
I can sense what you want today

Baby I know your mind
I know that you need me
Baby I can sense what you need

I have got a sixth sense
when you've got me in your head
so go ahead and send your thoughts to me

I have got a sixth sense
when you've got me in your head
so go ahead and send it on to me

Flow out of you into the air
you talk to me in my head
I can sense what you think today

I know that you need me too
Baby I can feel it from you
I know just where you are today
