My blood now runs cold
Waiting for the time to strike
There's a new sign of times
Nothing will be as you like

How long will I wait
I've been embraced by disbelief
I'm going to make my move
Lethal, brutal and complete!

You don't know me
I don't know you
Hide your mental disease!

Words you speak to me
Truly are weak to me
Hide your mental disease!

You judge me as you want
Upon your fragile pedestal
Full of lies you became
Don't you see my denial?

Can you understand your reality?
Have you found your mediocrity?
Has someone bought you integrity?
Now listen to me carefully!

You don't know me
I don't know you
Hide your mental disease!

Words you speak to me
Truly are weak to me
Hide your mental disease!

Denial of your dignity
Denial of your dignity
