I waited for too long
Just to knock at the door
And it's always been love songs
That pick me up off the floor
Then you said "I don't want you"
And you won't be able to be sad

If you want it you got it
Written over your face
Could you pay me a listen
I could pay you a gaze
Then you said "Now's not a good time"
And you won't be able to be sad
You don't get it
No, you don't don't get it

We're coming up quickly
To the end of the race
You're trying to figure out
How many ways you got to win
I'm waiting around while you're working it out
So you won't be able to be sad
You don't get it
No, you don't don't get it
