Natures first green was gold
Always still the hardest one to hold
We wont celebrate to forgive
I wont ask you where have you been
We crashed like twin tumbling towers
We rebuild because we believe in
Vampires but we're the last of a dying breed
I got friends that are good enough for me

You gave me the sun and I gave you the light
Give me the moon, I'll give you the night
I'd do for you what you'd do for me
You can ask for anything

We saw the coasts go to war
We saw the west fall to her knees

So get your moneys worth
You're my anchor when I sail
I hope you wont wonder too far from shore
You're my anchor when I sail
I hope you wont wonder too far from shore

Dawn went down today
Nothing gold will ever stay
So I fell asleep last night
With my eyes wide open
I could feel myself sleeping
But I wasn't dreaming
And then I found the meaning
Just when I thought the waves were over
I was swallowed by my pillows
And drowned in my bed
