SHE'S ALWAYS THERE

Through thick and thin
When the rain falls heavily upon your heart
And the world is just a wilderness
And your life looks like it's falling apart

Chorus:

She's always there
She's there to care
To bear the candle
And to show you where
She's there to care
To clear the air
None can compare
She's always there

2.

When you're wandering lost
And groping aimlessly in the dark
When the days seem long and never end
And leave behind their savage mark

3.

I have felt so low
With worries pressing all on my mind
She floated in like a wisp of snow
And now my troubles are far behind

4.

You have your faults
Like anybody from time to time
But they're far surpassed by the rays of love
That will glow forever in your perfect smile
