Everybody knows your name
They think you and I are the same
You've hidden way too many secrets from me
And now your lies are all I can see

[Chorus]

Being with you was a waste of time
You lost, no matter how hard you tried
I can see your heart deep inside
There's no longer room for you in my mind
You used to make my heart beat fast
Back when I thought our love would last
I'm sorry but your time is up
So leave with what you have

The music still doesn't drown out your voice
I can't escape from all of the noise
Those gentle words I held on to
I realize they meant nothing to you

[Chorus]
