### "Glory Hole"

Nothing good comes from a silent sigh  
Spare your surroundings and don't even try  
It's been pleasant but it's time to say good bye  
Go to the hole

It's rational to fear the mob  
But not sensible to carry that load  
Besides everything will burst nonetheless  
Go to the hole

It's time to take a walk  
Less preparation less talk  
State the state of your heart  
Have the courage to part  
Everybody needs to vent  
Here is love without resent  
And don't you worry about your soul  
It's just a glory hole

It's not fun but you need to trudge  
On a trail that's been walked on before  
Don't be so stern it will work out the best  
Go to the hole  
That dream about a candid talk  
Can be fulfilled with five minute march  
Tie your shoes and do what should be done
