In planet mars
There's a place we call Cydonia
Viking photos showed a lot
Of intersting spots

Draw in sand or rock
It has a human face
Has a nefertiti
And some pyramids and a well

I saw things like glass tubes
A transport system of lost cities,
Or from and underground town

Mars has it's mysteries,
It has two moons,
That scientists say
They behave unnaturally

Cydonia,
Has a lost city from a lost world,
Cydonia,
It arises from the sand of past,
Cydonia,
Remains of an ancient war

I could tell too about mars moon
Phobos, and it's mysteries
Some say that is hollow

It has an monolith
As Aldrin said
And if you check in infrared
You'll find a huge city

We demand
High resolution
Phooooootos
Of cydonia and phobos to clarify it all

We demand

That a mission land there
Robotic or manned
To solve these questions

Cydonia,
Has a lost city from a lost world,
Cydonia,
It arises from the sand of past,
Cydonia,
Remains of an ancient war
