

## Skull & Bones

### "Explorers"

Visit "[Explorers](#)" on [MotoLyrics.com](https://MotoLyrics.com)

They were the anunakki  
They came in search for gold  
Their atmosphere were in danger  
Their existence wast at stake

In Genesis they were called nephilin  
They came from the 12th planet  
Nibiru was the planet name  
4 hundred thowsend years ago

Explorers  
Came from a distant land  
Explorers  
Mined our gold  
Explorers  
They had another role  
Explorers  
Were our forefathers

Enki was their supreme leader  
He commanded them to their task  
Gold was found in africa  
There they started to mine

At that time they weren't taken as gods  
Just a bunch of workers.  
Far away from they home,  
They got a hard duty to fulfill.

Explorers  
Came from a distant land  
Explorers  
Mined our gold  
Explorers  
They had another role  
Explorers  
Were our forefathers
