The moon is not what they say  
It has great caves.  
Proof of this are the mascons,  
That illogical distribution of gravity.  
The moon has glass domes.  
Probably left by ancient aliens.  
And other structures,  
That easily could be used.

Some say that the moon is really a big artificial  
satellite.  
What we really know that is older than Earth.  
In the middle of the war, Germans kept their space  
program.  
Using a great flying saucer of Mieth and Schriever  
type.  
It had about sixty meters in diameter, and forty five  
meters tall.  
Since they landed, they started boring and tunnelling  
under the moon.  
And at the end of war they had a small base there.

Chorus  
There's a Nazi base on the moon.  
They managed to survive and still are there.  
There's a Nazi base on the moon.  
And they defend our planet from bad aliens.

There you can find arcs, buildings and vegetation,  
Cristal towers, ruins and water too.  
From time to time, people find something in the  
pictures.  
That were released by agencies like NASA.  
They got people checking the pictures for strange  
things,  
And got others to airbrush these.  
Hope one day they end this policy of secrecy,  
And all these things became known for mankind.
