"Nibiru"

Visit "[Nibiru](#)" on MotoLyrics.com

Millions of years ago
Tiamat was a planet
That orbited between Jupiter and Mars
Full of Jungles and Seas
Nibiru came
Colided with Tiamat
Destructed it
Generating the asteroid belt

One of it's moons
Were trapped in orbit
Between Mars and Venus,
Is Were we live
Other part of Tiamat
Spined towards us
Became what we call today
Our moon

The whell of time spins
The eons passed away
Sands of time has fallen
Are we in danger again?
Profecies spread away
Is it real or is it vain?
A lot of cults florish
Everywhere a lust for survive

Call it Nibiru, Call it Planet X
Will our world be hitted again
Call it Nibiru, Call it Planet X
Will Mankind survive the Trheat?
Call it Nibiru, Call it Planet X
Is an evil plot to make us surrender.
Call it Nibiru, Call it Planet X
Will we survive?

Will the Pole shift?
Will the Earth Shake?
Will volcanos erupt?
Will Tsunamis swept away?

Will We freeze on new ice age?
Will We burn on a heat wave?
Will a comet strike on earth?
Or an asteroid hit?

Call it Nibiru, Call it Planet X
Will our world be hitted again
Call it Nibiru, Call it Planet X
Will Mankind survive the Trheat?
Call it Nibiru, Call it Planet X
Is an evil plot to make us surrender.
Call it Nibiru, Call it Planet X
Will we survive?
