### "One-way Trip To Mars"

Visit "[One-way Trip To Mars](#)" on [MotoLyrics.com](https://MotoLyrics.com)

In the end of world war two germans had built an  
special flying saucer  
That was the one and only produced with seventy five  
meters in diameter  
A volunter suicide crew of Germans and Japanese was  
chosen  
Because was easier to send them without gear to  
return.

The craft had andromeda big tachyon drives  
And was armed with four triple gun turrets  
The crew was large, more than a hundred  
Because the low level of automation inside  
The flight to Mars departed from Germany  
One month before the war ended.  
The trip lasted eight long months  
They landed in january, forty six

Chorus  
One-way trip  
To mars  
This was done  
In nineteen forty five  
The brave entrepreneurs  
Was the germans  
They losed the war  
But not the space race  
One-way trip  
To mars  
That was an achievement  
For all humankind  
Suicidal mission  
Hope they survived  
And built a nice base  
To wait we get there
