In nineteen thirties Tesla was experimenting with
Moving through the Time/Space continuum
And the University of Chicago investigated how
became
Invisible through the use of electricity.
In nineteen thirty nine this project was moved to
Princeton's Institute of Advanced Studies
Einstein and Tesla were working to solve the unified
field theory

So the US Navy, in the second world war, wanted to
make ships invisible.
They used the destroyer USS Eldridge with full crew in
this
Experiment.
The generators were fired up. The switches were
thrown. The ship
Disappeared and all seemed well.

It travelled time and space, ended up (wound up) at

When It returns, some the saylors were dead, others
missing, some in fire,
And some crazy.
Some of the saylors were melted with the ships hull,
