I've been sitting on this wall too long
The bottles fell but they were strong
They kept their shape but not like me
I'm always wrong

Well my faith is cracked but hope is back
Though good direction's what I lack
You gave your pledge two-hundred
And sixty-two days ago

I took a break from what I should be
And now I'm back but I'm a sore sight to see

I've been walking all day through this mist
'Cause I can't help but fight for my name to exist and I
I've been feeling so empty but strong
'Cause my future is built off of proving you wrong

And regrets I have none
I'll be laughing at nothing and loving the sun
'Cause I'm changing and it's good
Oh my fearless endeavors are now understood
