they try to teach you right from wrong

put these ideas in your head

try to teach you good from bad

then they send you of to school

fill your head full of rules

it's all just lies what they said

just some shit to fill your head

they tell you to tell the truth

that's a lie in itself

it's all just lies what they said

just some shit to fill your head

don't ever ask them why

cause what they say it's all just lies
