house's scary Getting raided by word of canary,
situation get heavy Find out the cabalic dope spot with
your dawgs since elementary That shit preventing me,
definetly superior eeriness The 26th gaseous on the
blood and cryptic bodiment Shockwaves send and felt
outer space satellites Known to eclipse from the solar
of sodomites Keep rain down and sunlight Before the
deluge misery brough booze and paper five finger
plants On the vision of the dance, they throw parties
and pamp' Until them shotgun wizards advance Your
only chance of getting caught with altitude It's not hard
if you got your head on your clapables Stay boy
captavious, arrested in God's kitchen, wished you was
him And I think they know bout obtaining it Anyone can
fall victim to mental imprisonment The rappers in my
city flow infinite, you can easily drown in it That brown
shit, raggedy some project and street genes
