"Take Me Away"

Visit "[Take Me Away](#)" on MotoLyrics.com

Don't care where you're from
Care, care where you're from
Care, care where you're from
Cos you're coming with me

Don't care where you're from
Care, care where you're from
Care, care where you're from
Cos you're coming with me

Don't care where you're from
Care, care where you're from
Care, care where you're from
Cos you're coming with me

Hey ah ah
Pack your bags up
Turns the lights off
Put your kicks on
Lets get gone
We just live life
Don't think twice
Never look back
Headlights
They say we're young and we're dumb
And we don't give a fuck we just wanna have fun
Got team spirit in our lungs
Live for the moment
Take it
Own it
Tell me can you trust
Like you've never been hurt
Like you've never been cut
Like you've never been burnt
I want you to love
Like you've never been touched
Like you've never been kissed
Like you've never been (ahhh)
Didn't know you'd be feeling like this
Another day gone is another chance missed
Let me take you away

What's the answer
Are you ready for departure
Can't look back back back
Take the pain away let's just run away
Get on track track track
We can leave today
Let me lead the way
Your heart, your soul
I'll never let it grow cold
When there's nowhere left to go

So Take me away
Can you feel it yeah
Can you heal it
It's so right
We're running away
Like another lost soul
Just searching for a home tonight
Just wanna get away, get away
Before they finally break us down
They say we'll never get far
But we're shooting for the stars
And we might just touch the sky

Summer Time
Blue sky
Both come together
Like you and I
Legs intertwined
Watch the sunset
Rumours are hot air
Trumpets
Suspect one track minds
Split me and you
Is all they really want to try
All they want to do is kill this energy
Can we get away we got to be free

Only one word can describe you Rah
Don't have a reason to doubt you Nah
Heard you're looking for a formula
Call me Jeeves with the answers Yeah
Now let me show you something real
Take you to Rio
Tell the record label you're part of the deal
Change of plan
Let's hit Japan
Next stop a weekend at the motherland

Can't look back back back
Take the pain away let's just run away

Get on track track track
We can leave today
Let me lead the way
Your heart, your soul
Iâ€™ll never let it grow cold
When thereâ€™s no where left to go

So Take me away
Can you feel it yeah
Can you heal it
Itâ€™s so right
Weâ€™re running away
Like another lost soul
Just searching for a home tonight
Just wanna get away, get away
Before they finally break us down
They say weâ€™ll never get far
But weâ€™re shooting for the stars
And we might just touch the sky
The skyâ€¦â€¦

So Finally weâ€™re leaving
Giving me something to believe in
Itâ€™s a one way trip heading off track
Donâ€™t need no return weâ€™re never coming back
This time
Itâ€™s our final escape tonight

So Take me away
Can you feel it yeah
Can you heal it
Itâ€™s so right
Weâ€™re running away
Like another lost soul
Just searching for a home tonight
Just wanna get away, get away
Before they finally break us down
They say weâ€™ll never get far
But weâ€™re shooting for the stars
And we might just touch the sky
