[Overture I: The Falling]

"Adhaesit pavimento anima mea"

In the tower of nova plahernae

Only silence falls asleep

The angels shall fall again

As th river of Lethe floods

[Overture II: The Arrive]

"Vexilla regis prodeunt inferni"

Swords shall arise from the eastern land

The palace shall stain with blood

He has arrived, he is among us

The angel with the darkest heart

In the time of seven rounds of moon

The christendom shall drown in blood

Behold beyond the ocean, the emperor shall rise

Upon the christian nations, the crescent moon shall
shine

How painful the task of the angel of night

Fallen in love with the children of light

All desires I've turned to hate

Oh the beauty of mortals, and the pain they feel

No flower could last in the shadow of fright

From your eyes the life shall die if you touch his tears

Behold me! - such a dreadful fiend

As I weep, the flowers wither beneath

When all the roses are burning away

Like the beauty of orchid withered to grey

[Overture III: Firestorms]

The fires were dancing under his wings

Feathers were sweeping snowblizzards and winds

The blaze of flame - burning the skies

Under his footseps the skylines divide

Lakes started flming from each tear he cried

Under his wings - the storms of fire

[Overture IV: The oceans rise]

Anima mea adhesit - Ancilla prodeunt inferni

Qui lugent peccatum - Vexilla regis inferni
