You packed your bags for no return  
To a barron land, a barron land  
With oceans black as the night  
And coals for sand

The pain it scratches deep below  
It's surfacing, it's surfacing  
You can't escape from the past  
Or the secrets untold

So face your fears  
Come out from the underground

Please, don't let my love pass you by  
Pass you by  
Please, don't let my love pass you by  
Don't let it pass you by

Days are blurring into months  
The years go by, the tears run dry  
Your body remains  
Still your soul has left long ago

So do you feel anything at all?

Please, don't let my love pass you by  
Pass you by  
Please, don't let my love pass you by  
Don't let it pass you by

Redemption, redemption  
Is over the hill  
Forgiveness, forgiveness  
Is not a bitter pill  
So don't let our love dissipate  
Dislocate  
Salvation, salvation  
Don't hesitate
