All the time I'm not with you
My heart just wants to take off and fly
I look at life around me
but I can't forget you saying goodbye

Love is so far away
The way just seems to disappear
It's you to bring it back again
My heart is is with me loving you

The love is the way, love is the way

But Then I hear you talking
and I can't forget you walking my side
I see myself in darkness
and I can't forget what I feel inside

Love is so far away
the way just seems to disappear
It's you to bring it back again
My heart is is with me loving you

Love is the way, love is the way

La-la-la naa-na-na!!

But all the time I'm with you
my heart just wants to take off and fly
I look at life around me
and I can't forget you saying goodbye

Love is so far away
The way just seems to disappear
It's you to bring it back again
My heart is with me loving you

The love is the way, love is the way.
