{ Spokez }

I will be flying outta here from the atmosphere
The first martian to come down with a spear
Deadly with words and your life aint dear,
Clamp you like a lion on a buttocks of a deer
My finger tip shine like a silvertip beer
But I aint the one that is gonna put one in your derriere
I might gangbang but I aint a queer
Nightmare aint scared reality you should fear
Niggas finna take your life for missing your arrears
Put biblical holes in you call me the lion ariel
Leave u with staines you wish you had ariel
First funeral to be weird, me there with a leer
Leaving victims in the image of a ripe pear
Loud noise made me death victims plead I don't hear
Handgloves needed tissue will tear
I'm figity, might make one appear

{Chorus} 4*

Flying Through atmosphere, outta here (Atmosphere),
outta here (Atmosphere)
Flying Through atmosphere, outta here (Atmosphere),
outta here (Atmosphere)
{chorus}

I'm deadly more than capelo de cobra
We both known for taking hoods over our shoulder
Undercovers can sit there longer than a sofa
Cause I got more patience than a patient in coma
If it's needed I sling from here to minnesota
Limping on one foot looking like an amputated soldier
On the street I don't fear no one but jehova
Devil know I made the dough rise with the soda
Playing with chemical carbon creating cola
Things that will get sold from november to october
Cause I keep things in motion like a motor
The tool outshines the whole area like a supernova
I can't read stars I aint an astronomer
But if the tool come by I can predict your life is over
And I aint the guy to say I told ya
So don't wait untill your body get rolled up

{Chorus}

This guy is sick like he got a disease
Someone please go and find him a remedy
I have already had numerous visits to the gp
More than twice in this week
What the fuck do they want from me
I don't know but purple started sleeping with the heat
Now I can hear the devil banging next door when I'm at
sleep
Tell me that aint a nightmare dream
When u got the devil as a colleague
But me I'm not the type to work in a team
I'm the type to go for money quick with the beam
Minimum wage is when u do off licence robbery
Hmm not really, those robberies aint the type that
intrigue me
Cause I'm from a different type of species
Only recognise family others are fieces
{Spokez}

{Chorus}
