(Christi BauerLee/Dan Schmale)

As we grow we wonder the sense of emotion  
The foundation of our feelings, fears, and ideas  
Find that path of knowing where were going  
Then yet there those standing there thinking that  
you're crazy

Less confusion sets my mind at ease  
Commitment helps me supersede, negative word  
forced upon  
I'm blind to doubt, I will overcome  
(can't take that from me)

Optimism proclaims the possible world  
There's a fate that calls on you unless you act  
Keep enthused and the power will get you through  
Pessimism fears the truth in this

Less confusion sets my mind at ease  
Commitment helps me supersede, negative word  
forced upon  
I'm blind to doubt, I will overcome  
(can't take that from me)  
Can't take that from me, what will be will be

As we grow we wonder the sense of emotion  
The foundation of our feeling, fears and ideas

Less confusion sets my mind at ease  
Commitment helps me supersede, negative word  
forced upon  
I'm blind to doubt, I will overcome  
(can't take that from me)  
Less confusion sets my mind at ease  
Commitment helps me supersede, negative word  
forced upon  
I'm blind to doubt, I will overcome  
(can't take that from me)
