"Easy Does It"

Visit "[Easy Does It](#)" on MotoLyrics.com

You said you needed love to warm you in the night

So you gave yourself to strangers, who left you crying
at first light

You think the world you live in doesn't notice you

But don't you worry, baby, I'll be there to comfort you

So take it easy, easy

Easy does it, baby, nice and slow, I'll take you
anywhere the four winds blow

So weep no more, my lady, don't you cry

I can't paint your portrait with those tears in your eye

But I can give you love, every night and day

An' we will walk together, the sun and moon will light
our way

So take it easy, easy

Easy does it, baby, nice and slow, I'll take you
anywhere the four winds blow

I'll tell you something you'll understand

Grab a hold now, baby, and I'll lead you to the
promised land

I'll make you feel so good, make you feel alright

Chase away the shadows and keep you warm at night,
ooh, I'll keep you warm

Take it easy, easy

Easy does it, baby, nice and slow, I'll take you

anywhere the four winds blow

Gonna keep you smiling and satisfied

Nothing but blue skies on a magic carpet ride

Take it easy, easy

Easy does it, baby, nice and slow, I'll take you
anywhere the four winds blow

Anywhere the four winds blow, I'll take you there

Here we go, baby, hold on

No more worry, no more pain

The sun is always shining, and it never, ever rains, and
it never, ever rains

And it never, ever rains
