She looks, like she just stepped through the shower
Thionk of a good thing, think of a good thing
Noice is in, Noice is in the avenue
While you go, like you once did
When the trees were looking high
And records were your own bright colours-see me!
(chorus)
I'm fine, but it's sad
Waiting on this 'n' that, it's first base
Baby it's like right by the side of me
And when the madness comes to haunt you
Just about-face escape to my better castle place-yeah
Above me now you should be here now oh-oh
I built this castle it's where you fell
It's wehre you feel stoned and I don't tell
She sees Surrey's dustmen running home
To their beds and not their wives oh-oh
(repeat chorus two times)
