It feels like when I was young, The night before my
birthday comes
So up I couldn't sleep, That's what you do to me.
The way it felt when I would fly, On a tyre swing so high
Touch a cloud with my barefeet, yeah that's what you
do to me.

Every good thing I've known, All rolled into one.
Like summertime has just begun, Standin' in the
morning sun
I've never felt more free, That's what you do
When you do, what you do to me

Feel my heart beat so loud, Drowns everything else out
So close I can't breathe, Yeah that's what you do to me
Like the curve I took too fast, Scared to death but I still
laughed
First car just sixteen, Yeah that's what you do to me.

Every good thing I've known, All rolled into one.
Like summertime has just begun, Standin' in the
morning sun
I've never felt more free, That's what you do
When you do, what you do to me

Raindrops fallin' On my tongue, Chasin' fireflies
And catchin' one or two... Then there's you

Every good thing I've known, All rolled into one.
Like summertime has just begun, Standin' in the
morning sun
I've never felt more free, That's what you do
When you do, what you do to me

Every good thing I've known, All rolled into one.
Like summertime has just begun, Standin' in the
morning sun
I've never felt more free, That's what you do
When you do, what you do to me
