[Intro]

Turn around  
Yeah that's right

[Verse 1]

I was working all night in my office  
When a man I had recently killed  
Called me up from a phone near my building  
So I looked out the window at him  
He had the same obsequious manner  
That was the reason I had him killed  
So to calm my nerves I sang this song  
To him, over the phone

[Chorus]

Turn around, turn around  
There's a thing there that can be found  
Turn around, turn around  
It's a human skull on the ground  
Turn around, turn around  
Human skull on the ground  
Turn around

[Pre-chorus]

There's the sound  
Turn around, turn around  
I need one pound  
Turn around, turn around  
I saw you've drowned  
But turn around, turn around  
Turn around, turn around

[Verse 2]

I was out by myself in the graveyard  
I was doing an interpretive dance

When I felt something heavy and pointed  
Strike me in the back of the neck  
And then the ghost of my dance instructor  
Pushed me down into an open grave  
And as dirt rained down she played a xylophone  
And sang me this song

[Chorus]

Turn around, turn around  
There's a thing there that can be found  
Turn around, turn around  
It's a human skull on the ground  
Turn around, turn around  
Human skull on the ground  
Turn around

[Pre-chorus]

There's the sound  
Turn around, turn around  
I need one pound  
Turn around, turn around  
I saw you've drowned  
But turn around, turn around  
Turn around, turn around

Now will you turn around?

[Verse 3]

We were waving our arms out the window  
Of a fast moving passenger train  
Acting in an irresponsible fashion  
Until the engineer whose back had been turned  
And who we thought would find us highly amusing  
Quickly swiveled his head around  
And his face which was a paper-white mask of evil  
Cool hands, warm heart,  
Big dreams, false starts  
Those pills, don't work  
They just, make it worse  
Don't say, you're through  
I'll swim, beside you  
This town, this sea  
Won't drag you underneath  
Sick days, drunk nights,  
Short fuse, loud fights,  
Lose weight: all bones,  
White trucks, the undertow  
Don't say, you're done  
Cause you're brave and you're loved

[Chorus]

Turn around, turn around  
There's a thing there that can be found  
Turn around, turn around  
It's a human skull on the ground  
Turn around, turn around  
Human skull on the ground  
Turn around

[Pre-chorus]  
There's the sound  
Turn around, turn around  
I need one pound  
Turn around, turn around  
I saw you've drowned  
But turn around, turn around  
Turn around, turn around

Now will you turn around?
