I am living in
The skin I've been given
And the only difference
Is the skin that you live in
Your words about me
Judged by me
To see what's inside
'Cause they're firing blind

Empty your guns of names
At how I look and what I say
But you're firing with your eyes shut
Throw all your stones at me
At what I love
And what I think
Have it out,
But I'm not gonna break
'Cause underneath it all we're just the same

I was giving in
To the things you were saying
The bullets of
One word names
And if you could just see
What's in me
You'd be surprised
'Cause we're mirrored inside

Empty your guns of names
At how I look and what I say
But you're firing with your eyes shut
Throw all your stones at me
At what I love
And what I think
Have it out,
But I'm not gonna break
'Cause underneath it all we're just the same
(Instrumental Break)

Empty your guns of names
At how I look and what I say

But you're firing with your eyes shut
Throw all your stones at me
At what I love
And what I think
Have it out,
But I'm not gonna break
'Cause underneath it all we're just the same

(Empty your guns of names
At how I look and what I say
But you're firing with your eyes shut
Throw all your stones at me
At what I love
And what I think
Have it out,
But I'm not gonna break
'Cause underneath it all we're just the same)

(Empty your guns of names
At how I look and what I say
But you're firing with your eyes shut
Throw all your stones at me
At what I love
And what I think
Have it out,
But I'm not gonna break
'Cause underneath it all we're just the same)

'Cause underneath it all we're just the same
