I don't believe that I'm here when I know that I'm there  
Nothing they say will convince 'cos I know I am there  
Back of my mind there is fear that your not really there  
I won't say what you are not so juste wait don't despair  
You set off my brain  
End of the day is a time when locations convey  
I don't know what they would think if they knew of our  
play  
Conventions exclude from the ties that combine and  
replace  
Replace me again, take it back to the time  
You set off my brain
