

Simple Kid "Love's An Enigma, Pt. II"

Visit "[Love's An Enigma, Pt. II](#)" on MotoLyrics.com

Ain't gonna be no Desperate Dan, no man
When all my friends kept sayin'
That dame came straight out of a can
With your feminist stick and your Kathleen Hannah
Oh, don't go, oh, like you don't know,
oh

Playin' your games, hidin' your friends
Like in the Buffalo Bar your cocaine brain kept sayin'
That you don't play mind games but honey
you're not the Olympics
Sucked my soul into your nose
Bet it makes a big mess girl when it blows, oh

You hurt me
You hurt me
You hurt me
You hurt me
You hurt me

I want a lover
I want a lover that won't break me down
I want a lover that can see me through
I want a lover that just looks like you

And you're about as real as a fake tan
And your heart, it's like Kung Fu
You're like six different people dependin' on
who
You know might show to say hello
Just skippin' on souls like steppin' stones

You hurt me
You hurt me
You hurt me
You hurt me

You hurt me
You hurt me
You hurt me

I want a lover

I want a lover
I want a lover that won't play no games
I want a lover that just knows my name

I want a lover that can heal my heart
I want a lover that won't let me down
I want a lover that don't play,
Who's Who?
I want a lover that makes me all King Kong

I want a lover that won't cut me up
I want a lover that won't let me down
I want a lover that could help you too
I want a lover with a dirty mind

I want a lover that can see me through
I want a lover that can see through me
I want a lover that just looks like you
I want a lover that just looks like you

I want a lover that can see my face
I want a lover that will give me truth
I want a lover that got some kinky boots
I want a love that can let go of youth

I want a lover that will tie me up
I want a lover that can tie me down
I want a lover that don't stick like glue
I want a lover that just looks like you

I want a lover that could break my heart
I want a lover that can turn me on
I want a lover that just looks like you
I want a lover that just looks like you
