

## Sing It Loud "Over You"

Visit "[Over You](#)" on MotoLyrics.com

Waiting patiently I'm falling gracefully  
To my knees and as I look back up at you  
Nothing's coming true almost every time  
I try to figure out why I've had the ground  
My mind keeps telling me somethings got to change  
Now I'm begging please can you help me breathe

I can't get myself over you  
You've got all that I need  
(This isn't what you wanted)  
Yesterday is something we  
Will not forget so lets  
Waste away the days I've  
Said we'll never get the  
Chance to be again

Tell me anything please just anything  
Kill me with the words that also gently  
Make me feel at home watch me carefully  
Singing baby we can go home until my  
Lungs give out and we crumble from within

I can't get myself over you  
You've got all that I need  
(This isn't what you wanted)  
Yesterday is something we  
Will not forget so lets  
Waste away the days I've  
Said we'll never get the  
Chance to be again

I can't get myself over you  
You've got all that I need  
(This isn't what you wanted)  
Yesterday is something we  
Will not forget so lets  
Waste away the days I've  
Said we'll never get the  
Chance to be again
