It all begins with a single step
You and I can make a difference
Dare to dream
Dare to explore
Together we can do so much more
The key to the future is ours to share
Let's be as one as dreams unfold

Chorus 1:
We can be rays of sunshine that
Brighten up the skies
We can bring love
We can bring hope
There is so much we can learn
There is so much we can share
We can all be an inspiration

Bridge:
Hearts as one
We're ready to soar
Together we can do so much more
A bond we all share deep in our hearts
Let's be as one for evermore

Chorus 2:
We can face every challenge
And weather every storm
Together as one
For Singapore
We can show our love and care
There is so much we can share
We can all be an inspiration

(Repeat Chorus 1 & 2)
We can show our love and care
There is so much we can share
We can all be an inspiration
