She was cool, she was hot - she was ready for my blood  
She goes slow, so slow - oh she goes down low  
I tried it bring my message back  
Can't deny i really want her bad - so bad

I came back, to attack - i really want her back  
But for good, i could - that she will understood  
I'm out here with my restless heart  
Face to face i knew it from the start

How could you dream - we're go to extremes  
I will count my time - better call it crime  
And i'm ready for your scream

I will go on - my heart will beat  
I'll take your heart - when we will meet  
At the congress of deceit

Will i see her again, will she call me friend?  
She goes slow, so slow - oh she goes down low  
Will she ever heal my wounds  
Or is it up a big misunderstanding

How could you dream - we're go to extremes  
I will count my time - better call it crime  
And i'm ready for your scream

I will go on - my heart will beat  
I'll take your heart - when we will meet  
At the congress of deceit
