Burnin' through this spitting flame  
The heat is rising higher  
Move away, you can't love me any good  
You're behind me, well it would

Shooting from the stars  
How much longer will it take

Blood on the horizon  
Death howls in the wind  
They called him atomizer  
He's the finalizer

Screaming, the world is in disgrace  
How many times they try to break him  
I'm ready, ready to explode  
I will set him to acclaim

Shooting from the stars  
How much longer will it take

Blood on the horizon  
Death howls in the wind  
They called him atomizer  
He's the finalizer

Shooting from the stars  
How much longer will it take

Blood on the horizon  
Death howls in the wind  
They called him atomizer  
He's the finalizer

Blood on the horizon  
Death howls in the wind  
They called him atomizer  
He's the finalizer
