

Sinner "Lightning"

Visit "[Lightning](#)" on MotoLyrics.com

Breathe fire - I'm knee deep in your lies
where's the guy above - he's my alibi
no sign, no helping hand as the going gets tough
I lost all my faith, all hope in mercy from above
I saw the pope kissing concrete a mile away a hundred
children bleed
White lightning - stop frightening give me a deep
breath of live
white lightning - I'm gonna play it my way and it's so
dark inside

Where's the lord - who let all these children die
the church pretends the mess we're in back in the real
world
where weird things affect our live
look into the future unholy visions will rise
They showed me jesus wearing a cross next a bald
child, bone cancer she's lost
A white lightning a white lightning
