"The Gun"

Visit "[The Gun](#)" on MotoLyrics.com

Dreams come and go don't lose your self control the
prophets of doom
don't leave us alone dreams come and go in black &
white the future is gold
count on me if you're scared till the dam broke - walk
the edge
the real world is gone but we stay
We jump the gun - the systems are falling but we still
jump the gun
another world is dying - jump the gun
Believe it or not, things will happen here in the name of
god

count on me if you're scared till the dam broke - walk
the edge
the real world is gone but we stay
Give me one good reason only mind games can tear us
apart
count on me if you're scared till the dam broke - walk
the edge
the real world is gone but we stay
We jump the gun - the systems are falling but we still
jump the gun
another world is dying - jump the gun
Jump the gun
