When you're feeling wrong  
You think your heart is gone  
The sound of the voice changing to rhymes

How does it feel to you  
When you don't know the truth?  
How does it feel as a liar?

Don't you think the time has come?  
Don't you think it's a long way to run?  
There is just one evolution  
There will be execution

Can you look in my eyes?  
Can you listen to me?  
Just one step beyond  
And you can't reach the line

How does it feel to you  
When you don't know the truth?  
How does it feel as a liar?

Don't you think the time has come?  
Don't you think it's a long way to run?  
There is just one evolution  
There will be execution

When it's said and done  
Now my time has come  
I wouldn't say anything bad anymore

How does it feel to you  
When you don't know the truth?  
How does it feel as a liar?

Don't you think the time has come?  
Don't you think it's a long way to run?  
There is just one evolution  
There will be execution
