She's got the time
Says she's got time on her side
Running the rule
Commanding the late boys eyes
She runs around, knows all the streets by name
So mysterious, shadows meet James Dean
She's intoxicating, soon your favorite drink

Your black dress in disarray
Only dance floor prayers can save {you}
Temperatures rise and I start to move
But it's you that's coursing through my veins

Say she's got hope
Took shelter to the Hollywood list, taking control
Wanted my heart but I gave her my soul
She's like a Paige Davis with a Monroe kiss
Disappeared today, left no trace
But someday I'll know your name

Your black dress in disarray
Only dance floor prayers can save {you}
But it's you that's coursing through my veins

Don't need no drugs, you're my chemical
Now I'm dependent, swear I'm clinical
Addicted to those glances, taking chances tonight
I need a fix in those heroin eyes
Don't need no drugs, you're my chemical
Now I'm dependent, no not cynical
Addicted to those glances, taking chances tonight
I need a fix in those heroin eyes

She's no saint (she's no saint), she's no saint
She's no saint but she'll take you to your knees
Try her boy, but she'll still do what she please
Do you believe in science? She's perfect chemistry
She wanted my love but I gave her the rest of me

Don't need no drugs, you're my chemical
Now I'm dependent, swear I'm clinical

Addicted to those glances, taking chances tonight
I need a fix in those heroin eyes
Don't need no drugs, you're my chemical
Now I'm dependent, no not cynical
Addicted to those glances, taking chances tonight
I need a fix in those heroin eyes

You'll adore me before the night is over [x2]
If London's calling don't you dare pick up the phone
Only you entwined
Could make this orphan feel at home
Lips that need no introduction, but now waiting for your
call
If picture's worth a thousand words
Then your touch is worth them all

Don't need no drugs, you're my chemical
Now I'm dependent, swear I'm clinical
Addicted to those glances, taking chances tonight
I need a fix in those heroin eyes
Don't need no drugs, you're my chemical
Now I'm dependent, no not cynical
Addicted to those glances, taking chances tonight
I need a fix in those heroin eyes
