"They Follow You"

Wounds heal in time
Scars leave their signs
Sewn up inside, sewn up in mind
They follow you, follow you

Swallowing pills
Intoning spells, all potions spill
Down the wishing well
They follow you to sorrow you

It doesn't work anymore
They follow you to sorrow you

Sew up these eyes, stitch up this smile
Embroidered tears
Drown the wishing well
They follow you to sorrow you

It doesn't work anymore
They follow you, they follow you

Mix me a brew, an elixir to soothe
Mix me a brew, an elixir to soothe
A cure

Wounds heal in time
Scars leave their signs
Sewn up inside, sewn up in mind
They follow you to sorrow you

They follow you, follow you
A cure
