(Charmaine Sylvers/Dana Myers)

1..., 2...

1, 2, 3, 4

(taking over)

(your love has taking over)

(taking over)

(your love has taking over me)

from sun up to sun down

I searched, but never found

the kind of man who make a partnership

of love stand sure on solid ground

you came into my life

and brought our love that made everything alright

my lonely days are through

with a man like you

(taking over) take me over

(your love has taking over)

baby, your love

ooh, I can't get enough of

(taking over)

(your love has taking over me)

take care of business to my love

got you under my skin

but it's good, so good on my circulation, ooh

you grew so fast on me

build enough our strong love foundation

don't want a man I can rule, no

and I've been hurt enough, not to be a fool

with you, I'm in good hands

you know I am

baby, you're the man

(taking over) take me over

(your love has taking over)

hey baby, where you've been
all my life I thought love wouldn't come again
(taking over)
(your love has taking over me)
take care of business to my love

[RAP:]

I don't want no lover on the side
you've got just what I need
'cause I'm a real woman with an appetite
that only your love can please
the way you do the things you do
nobody came even close
and others have tried to
but it's you I dig the most

so take me over
you really got a hold on me
take me baby, take me, take me over
you really got a hold on me

[repeat rap]

'cause I don't want a man I can rule, no
and I've been hurt enough, not to be a fool
with you, I'm in good hands
you know I am
baby, you're the man

(taking over) take me over
(your love has taking over) over
ooh, I can't get enough
(taking over)
(your love has taking over me)
the way you do the things you do
nobody could ever make love to you
now take me over
(taking over)
(your love has taking over)
you got control
believe me, baby, you'll always take me over
(taking over)
