Hello. How are you?
You're standing at the cutting edge
You say it's quite a view
Hello. How are you?
Now me you see I'm not so sure
I think it's kind of friendly
All the boys are in couture
You say "Eh?"
You say "€!"

From the cave to the tabletop
From the cow to the fashion-shop
From the club and to the car
Petrol made of dinosaur
From Berlin and to the moon
Now why do movements have to move so soon?

My bedroom to your ma-ga-ga-zine
You were sweet, now you're totally mean
From the street to the café
"I love you, now go away!"
From Berlin and to the moon
Now why to movements have to move so soon?

We started a movement
We started a movement
We started a movement
And now that movement's moved
You started a movement
You started a movement
You started a movement
And now that movement's moved
We started a movement
We started a movement
We started a movement
And now that movement's moved
Who started (you do)
Who started (you do)
Who started (you do)

A E I O You

From the corset to the burning bra
Where we go nobody knows so far
Running out of dinosaur
Had it all "But I want more!"
From berlin and to the moon
Now why do movements have to move so soon?

We started a movement
We started a movement
We started a movement
And now that movement's moved
You started a movement
You started a movement
You started a movement
And now that movement's moved
We started a movement
We started a movement
We started a movement
And now that movement's moved
Who started (you do)
Who started (you do)
Who started (you do)

A E I O You

We started a movement
We started a movement
We started a movement
And now that movement's moved
You started a movement
You started a movement
You started a movement
And now that movement's moved
We started a movement
We started a movement
We started a movement
And now that movement's moved
Who started (you do)
Who started (you do)
Who started (you do)

A E I O You

A E I O You

A E I O You
